SUMMARY

I am dedicated Full Stack Developer and Trainer with extensive experience in front-end and back-end development, proven ability to drive projects to successful completion through robust coding practices, effective collaboration, and agile methodologies. Committed to contributing exceptional technical proficiency and continuous learning mindset to the innovative direction of a forward-looking software engineering team that values emerging technologies like AI.

TECHNOLOGIS | TOOLS

Languages	JavaScript (ES6+), TypeScript, HTML, CSS.
Libraries/Frameworks	React, Redux, NextJS, React Query, Node.js, Express, Socket.io. Ag Grid React, React-big-calendar, Dnd-kit.
Databases	MongoDB, MySQL, Firebase Firestore and Real-time database.
Frontend	Bootstrap, TailwindCSS, DaizyUI, SCSS, AntDesign, Charts.js.
Third Party Integration	OpenAI, Stripe, Google Maps, Cloudinary, PDF kit, Persona (KYC), Vimeo, Google Api's, Social Signin (Linkedin, Google), Leaflet.
Tools & Platforms	Git, Firebase, Docker, Netlify, Vercel, Agile Methodologies, JIRA, Clickup, Postman, Prisma.

WORK EXPERIENCE

MERN Stack Developer, Ropstam Solutions, Islamabad (2023-02 – Current)
Spearheaded the development of REST APIs and UI enhancements using MERN stack, improving application performance. Ensured project milestones were met on schedule through effective planning and multi-tasking.

Javascript Developer, Crudon Tech, Sheikhupura (2021-12-01 – 2022-12-10)
Create user-friendly, minimally viable projects that meet client expectations using ES6 JavaScript, with a focus on the object-oriented programming paradigm.

Full Stack Developer, Freelance, Fiverr | Upwork (2021-04 – Current)
Developed user-centric websites that align with business goals, utilizing a broad technology stack for optimal performance. Focused on customer requirements to deliver tailored solutions and improve user experience.

MERN Stack Trainer, Digital Ocean, Sheikhupura (2024-01 – Current) | Part Time
Delivered comprehensive training in MongoDB, Express.js, React, and Node.js to students and professionals, enhancing their skills in full-stack development.

EDUCATION

2016–2020	Graduated From University of Engineering and Technology Lahore

PORTFOLIO PROJECTS

ShopIT (E-Commerce Website)

- The front end is designed in **React.js**. Global state is managed using modern **Redux** with Redux Toolkit. RESTful API is designed using **Node.js/Express.js**, the database is managed in **MongoDB**. Payment Gate using **Stripe** and **JWT**-based authorization and authentication.

Bankist

- The Bankist app is designed to keep track of user transactions. **Dates**, Internationalization API's and Timers used.

Mapty

- Activity tracking app (**Leaflet**) design in Object Oriented Programming.

Pig Game

- Multiplayer game with pure **DOM** implementation.

Forkify

- The Forkify app is designed in the Model View Controller pattern. Search, filter, pagination, and cart functionality added with **ES6** JavaScript.

Documents Helper

- Documents Helper offers a versatile online platform that revolutionizes the way users interact with PDF documents. Enabling a wide range of functionalities, from **Editing PDFs** to accessing pre-built forms, this platform caters to a broad spectrum of needs for both individual and corporate clients, ensuring a seamless and productive user experience. (**https://documentshelper.com/**).

Bidzi

- Bidzi.io is an advanced online platform designed to streamline the process of buying and selling businesses. This comprehensive system supports end-to-end transactional operations including negotiation, document signing (NDA, LOI, SPA), and escrow services, ensuring a seamless and secure experience user-friendly interface. (**https://bidzi.io/**)
